EDUCATION

University of Illinois at Chicago

Expected May 2027

Bachelor of Science in Computer Science

CS Coursework: Data Structures, Machine Organization, Programming Language Design, Systems Programming, Databases, Computer Architecture, Software Design

TECHNICAL SKILLS

Programming Languages: C, C++, Go, TypeScript, JavaScript, Python, SQL, F#, Swift

Frameworks/Tools: Node.js, Express.js, FastAPI, React.js, Vue.js, AWS

Data/Streaming: Redis, Kafka, Redpanda, PostgreSQL, MySQL

Systems/Infra: Linux, Git, Docker, Elasticsearch, OpenSearch

Math/GPU/Scientific Computing: CUDA, CuPy, NumPy

PROJECTS

Live News Aggregation Feed

June 2025 - Present

- Engineered a React-based real-time news aggregation terminal, reducing latency to sub-second speeds, by building a streaming pipeline using WebSockets, Kafka/Redpanda, and Redis caching.
- Designed backend architecture with scalability in mind, simulating production-like distributed systems and exploring deployment patterns aligned with AWS-based infrastructures.
- Leveraged Elasticsearch/OpenSearch for full-text search and fast filtering across millions of news articles.

Meteor Impact Simulator – NASA Space Apps Challenge 2025

Oct 2025

- Engineered a GPU-accelerated asteroid impact simulator on NVIDIA hardware
- Integrated multiple real-world datasets (NASA NEO, USGS, GEBCO) to improve model accuracy, enabling realistic simulations of seismic and atmospheric effects.
- Accelerated simulation runtime by 2–5x by leveraging GPU parallelization with CUDA and CuPy.
- Developed FastAPI backend with async workflows and React, Three.js frontend for 3D impact visualizations.

Async Script Collaboration Platform

Feb 2026

- Designed and built a full-stack collaborative web platform enabling remote screenplay table reads with zero scheduling overhead.
- Implemented React, TypeScript frontend with Three.js (React Three Fiber) for immersive 3D typewriter UI and cinematic interaction flow.
- Developed token-based session architecture with Supabase (Postgres + Storage), supporting unique writer and actor links with secure role separation.

EXPERIENCE

MQI

Sep 2024 – Apr 2026

Course Instructor -

Willowbrook, IL

- Improved student performance and competition outcomes, mentoring 8 students by developing structured learning curriculum.
- Increased knowledge retention and engagement, by applying proven memorization frameworks across 178+ pages of material

Fresh Prints

Oct 2023 – Mar 2024

Sales Associate -

Chicago, IL

- Increased sales and profitability, by negotiating bulk apparel orders and optimizing pricing strategies for student organizations.
- Built relationships with student orgs and clubs in need of custom apparel.

CERTIFICATIONS

Apple Development with Swift – Associate (Certified)

Apple Inc., 2025

Demonstrates verified proficiency in Swift, iOS SDK, Xcode, storyboards/Interface Builder
